On-Site School Programs

Bookings can be made online at www.morrellnaturesanctuary.ca throughout the school year commencing in September.

A confirmation will be sent shortly after booking your program.

If you experience problems, please phone the office at 250-753-5811

A maximum of 30 students is recommended for quality interpreter-student interaction.

Morrell Programs will be run Rain or Shine. Unless there are high winds.

SEEDS & SPORES (Exploring change of season) Fall

Gr. K-1 Drive in - 1.5 hours \$60.00

Gr. 2-4 Walk in - 2 hours \$65.00

Students will be introduced to seasonal changes affecting plant lifecycles. Focus will be on the characteristics of seeds and spores found in our forest, and the interconnection of animals and plants in the environment.

MOTHER NATURE'S RICHES Spring

Gr. 3-7 Walk in - 2 hours \$65.00

This program will focus on the concepts of Traditional Ecological Knowledge that contains certain plants that were once vitally important to the Coast Salish Peoples of British Columbia

POND DIPPERS / INTRODUCTION TO LIFE IN THE POND Spring

Gr. K - 1 Drive in - 1.5 hours \$60.00

Gr. 2-5 Walk in - 2 hours \$65.00

Students will observe plants/animals by dipping and collecting specimens from the pond. Lifecycles, adaptations, and identification will be discussed.

EXPLORING NATURE All Year

Gr. K-1 Drive in - 1.5 hour \$60.00

A nature walk, focusing on our local plant and animal life. The children are encouraged to use their senses to explore this environment.

FOREST DETECTIVES All Year

Gr. K-1 Drive in - 1.5 hours-\$60.00

Gr. 2-3 Walk in - 2 hours -\$65.00

Students will search for signs of biodiversity in the forest community utilizing observation, investigation and deductions skills.

NATURE WALK (Exploring the forest) All Year

Gr. 3-12 Walk in - 2 hours \$65.00

This program provides a study of our Coastal Douglas-fir Zone and the relationship between plants, animals, and non-living factors.

Students will search for signs of biodiversity in Morrell's forest community utilizing observation, investigation, and deduction skills.

Morrell Sanctuary is a typical mature second growth forest. This program will also show students how to identify 7 of the most common trees found in our Coastal Douglas biome.
